### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,11 and are12 rejected under 35 U.S.C. 102(\*\*b\*) as being \*anticipated\*\* by \*Hill et al. Hill et al discloses the apparatus to effect the method of processing mail having a first location for a stack of first materials 27(cards) (figure 2)\* . Note also the second holding location 3,4 for second materials. The first and second materials are scanned to match the first materials with the second materials\*by identifiers on the first and second materials (see col 3,4 the objects of the invention). In regard to claims 2 and 12 , note in col 13 lines 51-62 the picking or the “conveying” of the materials upon the scanning of the materials.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over \*Hill . . Note in col 7 lines 47,48 or in col 8 lines 25-27 the carriers (materials) that would be folded and inserted into envelopes. To provide that Hill et al's folded material would be folded into three sections would be obvious as a mere choice of design to so fold the

material into as many folds as desired and therefore this feature is not afforded any patentable weight.

5.       \*\*.Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over \*Hill et al in view of Schneiderhan\*. To provide that Hill et al 's stacked material is advanced from the bottom of the stack would be obvious in view of the teachings\*of Schneiderhan 's use of the stacked material in figure 1 that is advanced from the bottom 30,32,34,36,21 so as to refill the stacks from the top and remove a sheet material from the bottom.

6.       Claims 3-6 and 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
